AZOMITE® Natural Trace Minerals

Date: 2/5/2016

.....

Analysis: 0 - 0 - 0.2 - 1.8 Ca - 0.5 Mg

.....

Description:

AZOMITE® is a natural mineral substance which is mined from the desert in Utah. It can be used as an agricultural fertilizer and/or soil amendment product. AZOMITE® is easy, safe to use and good for the environment. Technically, AZOMITE® is a highly mineralized complex silica ore (Hydrated Sodium Calcium Aluminosilicate or HSCAS), that formed when an ancient volcanic deposit filled a seabed an estimated 30 million years ago.

Product Derived From: Volcanic Ash

Guaranteed Analysis:

- 0 % Nitrogen
- 0 % Phosphoric Acid
- 0.2 % Potash
- 1.8 % Calcium
- 0.5 % Magnesium

This product is not registered for sale in the states of NM, WI and MS.
